

DebtWrestler™ was created specifically for businesses with delinquent Corporate accounts that have not been sent for "collection"

DebtWrestler.com

enabling win-win debt settlements

DW offers the Debtor multiple payment options to enable them to be able to afford a payment method that will satisfy their Creditor and their budget.

Settlement payments can be made by either a single payment or on an installment plan and use either an eCheck or a credit/debit card.

Compatible with virtually all accounting software

Available in multiple languages

DW uses our sophisticated and proprietary Debtor-facing 'online debt settlement engine'.

With DW, a Debtor can make a proposal to their Creditor to settle their debt by offering to pay a lesser amount than their outstanding balance.

Negotiated settlements are based solely on numerous debt settlement criteria set by the Creditor.

Debtors are invited to make a settlement proposal after receiving a personalized email invitation generated by DW using a Creditor's 'delinquent accounts' Excel file as input.

Extensive reporting and tracking of payments and debts

The Debtor is automatically sent alerts for upcoming scheduled payments

The Debtor pays 100% of our fees.

NO settlement, NO fee.

With DW, there are **NO collection costs to the Creditor***.

If DW accepts their offer, this could be the perfect non-confrontational way to transform a delinquent Debtor into a settled account. Think "Priceline® meets debt collection" - the Debtor makes you an offer for you to 'Accept or Reject'®.

* Non-PayClix merchants will be charged a monthly Account Maintenance Fee

For further information and pricing, contact: DebtWrestler™
